

Mini and Morris Minor

By Richard Maxted

Introduction

This manual now only covers the Mini and Morris Minor Pack. These are the first vehicle assets I built and are designed as static assets. You will find them under Vehicles and People type things as:

RMAX_(vehicle type)_(colour)

I don't know if you can use them as Moving Traffic on roads, but they work just fine as static objects. The cars have no glowing headlights - as static objects this would look odd.

To make your own cars is dead easy. Every car has only one texture. The texture is a simple alpha reflection one. If you do not include an alpha channel the car will be very shiny but it will work. The only exception to this is the Police Panda and AA Van which is a more complex model and texture. Company names etc are painted on the texture - you will see how these work if you look at a texture.

The cars are then mainly simple Reskin Blueprints which replace a "master" texture with another. This makes adding new colours a quick and easy process and keeps the number of files used small. It makes for very efficient model use as well. Have a look at the Grey Mini to see how it all works.

Version Control

| Release | Description | Date |
|---------|---|----------------|
| v1.0 | Original release | September 2015 |
| V2 | Remodel of all Mini's. Replaced Glass texture. Added Cooper | November 2015 |
| | | |

Conditions & Licence – PLEASE READ THIS

For freeware that you develop for yourself or for release as freeware on any website or system, you have an absolute and total right of ownership. This package contains only assets made by me – it does not need any other downloads. It does use unmodified generic Railworks wagon sounds and a driver. You may use it, clone it, modify it, rebadge and rebrand it.

It may not be used where payment is sought or other commercial activities. I reserve absolutely the right to determine what is commercial. Charityware is commercial but is likely to be granted access.

If you release this asset modified then please DO NOT USE THE RMAX_ prefix to the files you make but add your own. This is to ensure the originals stay the same and to allow me room to expand the collection.

The Mini

There are 22 different versions of the Mini in this pack - based on a new improved model in version 1.1.

The pack includes both Mini and Minivans. The main part of the pack are versions of Mark 1 minis with and without wing mirrors.

I had one in "sand" as a student.

There are also these three 1970's Mark2 with the diamond radiators, 1970 paint jobs and door mirrors. I have also added six of the 3cwt mini vans. These are both in plain colours and with some company names.

There are also three specials - the AA van, a rally Mk1 Cooper, and the Police Panda Car.

The Morris Minor

There are 19 different versions of the Morris Minor in the pack. These include 7 cars, 5 Morris Traveller estates and 7 Minor Vans. The vehicles come in typical colours - with a better darker texture set than version 1. There are also 5 of the classic Travellers with wooden frames.

The Morris Minor comes in two basic types - the 2 door and the 4 door. These are actually the same model but with different textures.

Similarly there are split and full windscreen versions again just using a texture to do this.

There are 4 of the plain 8cwt Morris Vans and 3 vans supplied with company lettering - a smithy, electricals shop, and carpet shop.

There are also the classic Red Royal Mail van and a Post Office Telephone Van. However, I do have to say that there are some far better versions of these available as re-textures of this model on UKTS by Brian Yeomans.
